After School:

We understand that children attending Elementary school have a very busy and exhausting daily schedule. We look forward to picking them up and allowing for a fun and enjoyable transition for each child. We become an extension of your family! Having your child attend our afterschool program allows them to build valuable relationships within a supervised yet relaxed after school environment. We are able to guide and assist children in making good choices and help in building good character traits on a more personable level.

Homework:

Children have an opportunity to play for a period of time prior to our homework session. Children that do not have homework begin centers or have the opportunity to do extra credit work that will earn them special rewards.

Holiday Camp/Field Trips:

We provide field trips on school holidays.
